

PSI SEMICON SERVICES

Extending the life and value of your legacy and obsolete semiconductor technologies.

Established in 1967, PSI Semicon Services, a subsidiary of Phillips Service Industries, is the world's largest independent engineering, repair/refurbish/rebuild and logistic provider for semiconductor production equipment. Our knowledgeable engineers use the latest technology to diagnose, evaluate, repair, calibrate and test some of the most advanced semiconductor manufacturing equipment in the market today, as well as legacy equipment that is no longer supported by the OEM. Our services cover a wide range of semiconductor equipment, such as robotics/motion control, printed circuit boards (PCBs), motors, controllers, power supplies, RF equipment, and vacuum components. PSI offers cost-effective solutions, fast turnaround times, emergency/priority services, and a one-year warranty (from date of shipment) on all work.

Give the semiconductor equipment repair experts at PSI a call today at 800.325.4774.
